

# Take part in NHS research

**Help improve treatments and care**

# What is Research for the Future?

It is an NHS supported campaign to encourage people to get involved in health research.

Our 'Help BEAT' campaigns invite people living with certain health conditions to register to hear about relevant research opportunities. Current campaigns are; Help BEAT Diabetes, Help BEAT Heart Disease, Help BEAT Kidney Disease and Help BEAT Respiratory Disease.

## What does it involve?

Joining Research for the Future means you agree we can send you information about health research. When you join you will be asked for your contact details and some basic questions about your health condition. We use this information to tell you about research opportunities that you may be suitable for.

There are lots of different types of research for you to take part in. These include questionnaires, discussion groups and trials of new treatments. It is always your decision whether to take part in any research you receive information about.

## How do I sign up?

If you are aged over 18, contact us using one of the options below:

[researchforthefuture.org](https://www.researchforthefuture.org)

Text research and your name to **81400**

**0161 206 3636**

Joining Research for the Future is free and your participation is voluntary. You can leave a study or Research for the Future at any time without affecting your care.

Any information you provide will be stored on a secure NHS database, kept in accordance with the General Data Protection Regulation (GDPR) and Data Protection Act (2018). Only the Research for the Future team have access to it. Your details will never be passed to anyone else. For our privacy notice, please see: [www.researchforthefuture.org/privacy](https://www.researchforthefuture.org/privacy)

Research for the Future is provided in partnership with the National Institute for Health Research Clinical Research Network Greater Manchester, NorthWest EHealth, Health Innovation Manchester and the Northern Care Alliance NHS Group.
